# Meeting Agenda 7

Abrar Attia
Mediha Munim
Susan Fayez
Group 7

November 23 2017

Meeting Chair: Mediha Munim

## 1  Agenda

- Discuss implementation improvements

- Assign tasks for project demonstration

- Discuss user surveys

## 2  Minutes

- Discussed the possibility of adding a start page before lesson selection ("Welcome to ReTouch! Developed By...)

- Need to add words prompting user to select a lesson on lesson selection page

- Discussed possibility of adding a help tab

- Need to improve graphics

- Need to add back button the let user pick a different lesson during a lesson or at results page

- Sections of the presentation: Introduction, problem statement, purpose, scope, k-touch and it's problems, demo, key features of ReTouch, testing, further improvements, and conclusion

- Drafted questions for user survey:

- On a scale of 1-5, how difficult was it to use?
- Which program was easier to use – KTouch or ReTouch?
- See how long it takes them to start a lesson
- Did it perform the same way as you expected it to (based on the instructions)?
- Were you able to complete the lesson?
- Did you find the lesson challenging or helpful?
- Did you find that the application lagged in any way?
- Were you offended by anything in the program?

# 3 Homework

- ALL: Give the user survey to as many people as possible

- Abrar: Look into help tab and back button. Assigned sections for the presentation: Problem statement, testing, conclusion.

- Mediha: Look into improving graphics. Assigned sections of the presentation: Intro, ReTouch demo, further improvements.

- Susan: Look into start page and lesson selection page improvements. Assigned sections of the presentation: scope, K-Touch problems, K-touch demo, key features.
